

SimControl2023.1

IMMERSIVE TECHNOLOGIES

EXPECT RESULTS

Get the most out of your simulator purchase with the latest version of SimControl - including vital updates and new functionalities.

- **New PRO5 Enhanced Graphics features**

- 'Driving to conditions' training – includes improvements to weather events that reduce driver visibility for Trucks, Excavators, Shovels and Electric Shovels
- Electric cable management for Rope Shovels
- Competition mode for Excavators, Shovels and Electric Shovels

- **Surface and Underground Mining Features**

- Top Loading for Excavators – gain proficiency in this hazardous same-level loading technique
- Wheel Loader Stockpile Operations – train direct loading into the crusher and truck loading at the stockpile
- Next Generation Rope Shovel Dipper (TRC Dipper) – optimize your digging technique
- Electric Cable Management for Hydraulic Shovels – learn safe cable handling and positioning
- More Light Vehicle Training Options – armor configuration, transmission failure event, peripheral view darkening

- **Increased Autonomous Functionality**

- Komatsu FrontRunner® Autonomous System – new machine support, new language (Swedish), new operator errors
- Cat® Command for Hauling – enhancements to Dozer simulations, and to events for loading machines
